Summary

Experienced Software Engineer with a strong background in AWS cloud solutions, system architecture, and application optimization. Proven track record in leading development teams and initiatives to enhance software performance and reliability. Adept at leveraging programming skills in NodeJS, Python, and Java to solve complex problems and improve business operations through technology.

Skills

Areas of Expertise: Cloud Computing Solutions, Design and Development, System Architecture.

Languages: NodeJS/TS, Python, Java, C#, SQL

Tools: VS Code, Shell

Databases: MongoDB, PostgreSQL, Oracle

Domains: Banking, Securities, Telecom

Certifications

AWS Certified Developer: Expired Oct 2024

AWS Certified Solutions Architect: Expires July 2025

Experience

Capital One, Sr Lead Software Engineer

Richmond, VA
May 2022 – present
2 years 8 months

- (2024) Led initiative to execute Build vs. Buy POC of AWS Contact Lens for its capabilities and performance, in partnership with Card Data Science and AWS.
- (2023) Led multiple well-managed and SRE initiatives. Prepared a strategy to elevate the Test Automation Level based on application patterns.

Capital One, Lead Software Engineer

Richmond, VA
Oct 2012 – May 2022
9 years 8 months

- (2021-22 NodeJS, TS) Designed and developed "VSS Lite" suite of lambda apps in NodeJS, a DR solution of the IVR. Developed multiple serverless apps and utilities for the pilot project of telephony system integrating seamlessly with Amazon Lex. Re-designed and developed softphone application OneComm.
- (2019-20 Serverless Apps in JS, TS) Led the modernization of data processing jobs (Ab initio) to cloud-based solutions (PySpark ETL), enhancing efficiency and scalability.
- (2018 - Java, NodeJS and MongoDB) Worked on Java Spark and NodeJS batches to tokenize ~50M accounts and migrate ~250M records.
- (2015 C#) Developed core services (logging, exception handling, file rollover) for the consumer teams.
- (2016 NodeJS, MongoDB) - Developed high-performance REST API services using NodeJS and MongoDB, handling 2 million daily requests with exceptional reliability and speed.
- (2014 C#) Delivered high quality CTI solution via agile best practices such as Paired Programming, TDD. Elevated & maintained code quality and PCI compliance by identifying & disseminating the solutions to the IRIS platform teams.
- (2012 C#, VS2010) Worked on CTIBHO (Computer Telephony Interface)

to support Avaya Dialer upgrade to version 5. The project won the Enterprise Circle of Excellence award

Wells Fargo (via Infosys), Technology Analyst

- (C#, VS2008) Worked on Wells Fargo + Wachovia merger project to optimize/tune the application performance and the Oracle DB queries. The performance improved by 50% (Oracle DB) to 90 % (app loading).
- Liaison between offshore development team and onsite client/business analysts

Richmond, VA
Dec 2009 – Oct 2012
2 years 11 months

Wells Fargo (via Infosys), Senior Software Engineer

- (C#.Net) Developed client-server web applications, Windows Services, Web Services.

Hyderabad, India
May 2007 – Oct 2009
2 years 6 months

Verizon (via Infosys), Software Engineer

- (C#, VS2005) Developed a Verizon One Source module single-handedly on all the waterfall phases and delivered it with zero bugs.

Mysore, India
Dec 2005 – May 2007
1 year 6 months

Education

BE **Government College of Engineering, Amravati University, India** [🔗](#),
Information Technology

Sept 2001 – May 2005

- **Percentage Score:** 65%
- **Coursework:** Computer Architecture, OS, Data Structures & Algorithms, DBMS, Networking, Software Engineering, Digital Communication
